DETAILED ACTION

Supplemental Notice of Allowance

Allowable Subject Matter

1. Claims 1,3-9,11-29,31-37,39-56 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1,3-9,11-29,31-37,39-56 are allowed over the prior art of record because the Examiner found neither prior art cited in its entirety, nor based on the prior art, found any motivation to combine any of the said prior art which teaches an image reading device comprising: control means for causing said moving means to move said glass platen while the reading section reads an image at the reading position; wherein the reading position on the glass platen is moveable relative to the reading section wherein; said moving means moves, during an interval between a start and an end of reading of the document, the glass platen from a preselected home position by a preselected stroke and then returns said glass platen to said home position at least one time, respectively, as set forth in Claims 1 and 29; wherein said moving means moves the glass plant, and cleaning means moves relative to said glass to thereby clean the top of the glass platen, as taught by claims 17 and 45; a contact image sensor for reading an image', a press roller for conveying a document while pressing said document against said contact image sensor, and constituting a white reference; sheet pay-out means for paying out a transparent sheet held between said contact image sensor and said press roller and used to lay the document thereon; sheet take-up means for taking up the transparent sheet paid out; and control means for causing said sheet pay-out means to pay out the

transparent sheet during reading of the document; wherein said control means causes said contact image sensor and a reading position of the transparent sheet to move relative to each other while causing the reading section to read an image, as taught by claims 25 and 53; wherein while causing said moving device to move said glass platen, said controller causes said reading section to read an image, determines whether or not contamination is present on the basis of resulting image data, and distinguishes contamination of said glass platen and contamination of said white plate, as taught by claims 11 and 39 including all of the features recited therein. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
